Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-9, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Harper et al. (US 6,167,930).

With regard to claims 1, 3-5, 7, 8, and 17, Harper discloses an expandable basket mold for making a basket including:

1. a plurality of separate mold sections (11, 12, 13) comprising at least a bottom section and a top section defining a contiguous circumferential sidewall; See Figure 1;

2. the plurality of separate mold sections (11, 12, 13) being secured together to form the basket mold by a bolt (17, 18);
3. the plurality of separate mold sections having a passage defining a throughbore (14, 15, 16); and
4. the contiguous sidewall increases in radius between the bottom surface and the top surface. See Figure 1.

With regard to claim 6, Harper discloses an upper edge profile substantially matching a lower edge profile of the next adjacent mold section (column 2, lines 29-33).

With regard to claim 9, Harper discloses a larger diameter passage (13) capable of being used with a bolt nut.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
